SUMMARY

With a background in commerce and investment management, complemented by newly acquired full-stack development skills, I am seeking to transition into a career as a Python and Django developer. In addition to expertise in Python and Django, I have experience with JavaScript and am currently expanding my proficiency in React. Passionate about leveraging my problem-solving abilities and business acumen to develop innovative, user-centric web applications that drive efficiency and enhance business operations

SKILLS

Python, Django, Javascript, HTML, CSS, React, Mysql, MongoDB, Version Control(Git)

EXPERIENCE

Internship

The Entrepreneurship Network

📅 01/2025 - Present 📍 Remote

- Gained hands-on experience in full-stack development using Python, Django, JavaScript, and React
- Developed and optimized web applications, implementing user authentication, database management, and dynamic front-end features
- Collaborated with a team to build scalable and efficient solutions, focusing on enhancing user experience and performance
- Built and managed web applications using React, handled data with REST APIs, and implemented CRUD functionality.
- problem-solving skills by debugging issues and implementing best coding practices
- Highlight your accomplishments, using numbers if possible.

PROJECTS

Ten-Summit(Team leader)

Led the development of **Ten-Summit**, a full-stack web application integrating Django and React, focusing on seamless API communication, performance optimization, and scalability.

- Led the development of **Ten-Summit**, a full-stack web application integrating **Django (backend)** with **React (frontend)**, ensuring seamless API communication.
- Designed and optimized **RESTful APIs** for authentication, data retrieval, and business logic while implementing **React state management** and **Django ORM**.
- Collaborated with the team to enhance **scalability, security, and performance**, following best practices in API documentation and system architecture.

Charm Emporium

Short summary of your work

- Developed and optimized **RESTful APIs** using Django and DRF, ensuring efficient data exchange and smooth API responses.
- Designed and integrated **MySQL databases**, creating efficient schemas and optimizing queries for performance.
- Implemented **user authentication, product management, and order processing**, collaborating with the frontend team for seamless API integration.
